No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 4,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Length 383;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               and Expression of
Receptors
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 4, Application US/08196989B

Sequence 4, Application US/0819698B

Patent No. 535476

GENERAL INFORMATION:
APPLICANT: MacCennan, A. John
TITLE OF INVENTION: Molecular Cloning and Expression
TITLE OF INVENTION: G-Protein Coupled Receptors
NUMBER OF SEQUENCES: 1
COMPRESSEE: Saliwanchik & Saliwanchik
STREET: 2421 N.W. 41st Street, Suite A-1
CITY: Gainesville
STATE: FL
COMPUTER: FL
COMPUTER: FL
COMPUTER: EADABLE FORM:
MEDIUM TYPE: FLOPAY disk
MEDIUM TYPE: FLOPAY disk
COMPUTER: IBM PC Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: IS-FEB-1994
CLASSIFICATION NUMBER: US/08/196,989B
FILING DATE: 15-FEB-1994
CLASSIFICATION NUMBER: 35,589
REFERENCE/DOCKET NUMBER: MAC-100
TELECOMMUTICATION NUMBER: MAC-100
TELECOMMUTICATION NUMBER: MAC-100
TELEPHONE: 904-375-5800
INFORMATION FOR SEQ ID NO: 4:
SEGUENCE CHARACTERT.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Clohing of the rat edg-1 immediate-early gene: expression pattern
auggests diverse functions.";
Gene 149:331-336(1994).
I- FUNCTION: IT 13 POSSIBLE THAT IT ACTS AS A RECEPTOR FOR A TROPHIC
FACTOR AND IS INVOLVED IN THE SURVIVAL OF BRAIN CELLS.
I- SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN
I- SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN
FOSTNATAL STAGE: FIRST DETECTED AT EMBRYONIC DAY 15. AT
FOSTNATAL'DAY 14 DETECTED IN SKIN, SPLEEN, LIVER, KIDNEY, HEART,
                                                                                                                                                                                                                                                                                                                       ERSLTWARRGPAPVSSRGRTLAMAAAWGVSLLLGLLPALGWNCLGRLDACSTVLPLYAK 191
